DETAILED ACTION

1. Claims 1-41 in condition for allowance.

2. The following is an examiner's statement of reasons for allowance: The prior art(s) of record does not disclose alone or in combination:

Regarding Claims 1, 8 and 14, where the reference of Xue [148] and other prior art(s) of record does not teach controlling the operation of the actuator using the first voltage, providing the second voltage to the device, a second voltage that is lower than the first voltage. Applicant argued that the Xue [148] voltage applies to both the actuator and the device is identical and teaches the battery provides and the device operates at identical voltage. Examiner agrees with this assessment and the current argument and amendment overcome Xue [148] as well as other prior art(s) of record.

Regarding Claim 20, the prior art(s) of record does not disclose alone or in combination all the components/structure in the current invention and the activation of the third relay deactivates the second relay, and wherein the first relay is deactivated by the switch opening, the deactivation of the first and second relays causing the dc chopper module to deactivate, thereby stopping the second voltage from being outputted.

Regarding Claim 32, the prior art(s) of record does not disclose alone or in combination all the components/structure in the current invention and the activation of the first and second relays causes the first voltage to be applied to the control line, thereby activating the dc chopper module and the third relay, and wherein the third relay deactivates the second relay and opening the switch deactivates the first relay, thereby removing the first voltage from the control line.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner 3. should be directed to Tyrone W Smith whose telephone number is 571-272-2075. The examiner can normally be reached on weekdays from 8:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Martin, can be reached on 571-272-2800 ext.37. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
